\*Market staff or designated representative may visit any approved producer’s facilities to ensure compliance with applications and market regulations. Non-compliance issues will be reported in writing by the Market Manager. \*\*Section 27-65-103 (b), Mississippi Code of 1972, provides an exemption from sales tax for sales of agricultural products only when sold by the producer and when sold in their original state without further processing or preparation. The mixing of products purchased from another producer with products raised by the seller will result in all sales becoming taxable.
